Addendum Item 2

Amend paragraph 6.7.12 - to read the following:

It is noted that the four blocks of terrace houses would have windows on the front which would face on the rear gardens of properties on Vancouver Road and windows on the rear elevation facing onto the rear gardens of properties on The Chase. The terrace properties within the middle of the site would have a front elevation 27.5m from the rear facing windows on Vancouver Road and a rear elevation 24.5m from the rear facing windows of properties on The Chase. Objections have been received from neighbouring properties in The Chase and Vancouver Road regarding the proposed terraced properties causing visual impact loss of light, overlooking and loss of privacy. However it is considered that given that these properties are sited in excess of 21m from the proposed development there would be no undue impact with regard to outlook and visual impact. The proposed terrace houses would have rear facing windows at first floor level which would offer views of the rear gardens of these properties. However given the separation distance it is not considered that this would be unreasonable layout in this suburban location.
